

# Kubernetes

## Day3

### Lab3

#### Logs from a Pod

#### Required:

Monitor the logs of pod foo and:

Extract log lines corresponding to error file-not-found

Write them to /opt/KUTR00101/foo

#### Solution:

Use the following command:

```
kubectll logs foo | grep "file-not-found" | sudo tee /opt/KUTR00101/foo > /dev/null
```
